

ULTIMATE AI

Quick Start Guide

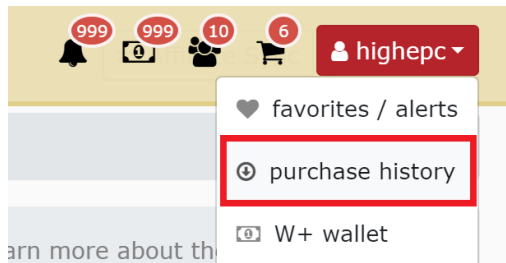

Welcome to Ultimate AI.

This short and sweet guide will get you setup with the AI in minutes!

🔥🔥 You made a smart choice - now let's get going, in seconds 🚀

1. Accessing Everything - Members Area

To visit the **Ultimate AI members area**, log in to your WarriorPlus account - and click your **username** in the red + click **“purchase history”**:

There you will find all the recent purchases you made on Warrior - including links to all the Ultimate AI members pages.

2. On The Members Area...

You will be able to access all the software tools. **If you ever need to login or create an account for a software tool, be sure to use the email address you purchased with on W+.**

3. Getting Updates (To AI + Ultimate AI)

AI is constantly changing (in the last six weeks we have seen GPT v4, MidJourney v5, Canva AI, Runway ML now moving to 15 second snipper, the rise of “AI agents” and

more!). I do regular updates to the core Ultimate AI tools, free training videos on AI updates, and also webinars with new training and tactics.

To ensure you get access to all this, **hit reply to my “welcome email”**. I will send you a bonus AND it will ensure my email is whitelisted.

4. REQUIRED To Use Ultimate AI

Ultimate AI connects to Chat-GPT & Dall-E, two AIs that are owned by OpenAI.

If you don't already have an account with OpenAI, you will need to do the following:

1. Create an account with them <https://platform.openai.com/account/api-keys>
2. Get an API key - <https://platform.openai.com/account/api-keys>
3. Insert the API key into the settings page of Ultimate AI and hit save
4. Then you can start using all the tools. That's it

5. Recommended Extra Software + Files

One issue with pushing the AI to its limits is that it can't take us where we want to go on its own. For example, Chat-GPT has a 4k token limit which means it can't easily give us very long replies. Therefore, certain AIs will require extra files. A few examples:

1. The “create prompt software” AI creates code which then needs to be inserted into my template HTML
2. The image-related loopholes can only generate 1-3 images at a time, owing to the long code in sirv links
3. The “create music” prompt requires us to convert MusicXML into a new format (stripping away redundant code & creating a kind of simplified “melody XML”)

Therefore, on the members area you will find links to these extra files, along with training videos that explain how to do this - and various other bonuses. I regularly update the members areas with extras, so bookmark the main “frontend members page” and check your inbox for updates I send out.

Secondly, I am including some surprise bonus tools. These are not strictly required to use Ultimate AI. But they do connect with the software, and so will be useful...

#1 - Push Pro Lite

Build a web push notification list (and broadcast/send followups etc)

USE: Blast push notifications you make with Ultimate AI

Access this at <https://www.pro.club/register/PushPro%20Lite>

#2 - eCom Crusher

Create designs for t-shirt, mugs to sell on sites like Spring, Shopify, GearBubble etc

USE: Create tee-designs you make with Ultimate AI

Access this at <https://www.pro.club/register/eCom%20Crusher>

#3 - Keyword Titan

Find keywords which are easy to rank for on Google/YouTube SEO & PPC

USE: Use for keyword research for article creation

Access this at <https://www.pro.club/register/Keyword%20Titan>

#4 - Commission Builder

Create bonus pages with Ultimate preloaded campaigns, then get 60x traffic

USE: Promote any affiliate program.

Access this at <https://www.pro.club/register/Bonus%20Builder>

6. My Latest “AI Tech Stack” - April 2023

OK here is my AI tech stack for April 2023, in the rough order which I use them:

1. **ChatGPT** - <https://chat.openai.com/chat>

I use this for a whole range of purposes such as creating software, writing sales copy, and doing technical research. If you have \$20/month I would definitely upgrade to “Chat-GPT Plus” (click on “your account” on the left) as it gives you access to GPT-4 which is the most powerful model. Notable mention: Google’s Bard (<https://bard.google.com/>) which as of April runs on a more powerful “PaLM” model. Will only get better. Google can’t afford to lose this race!

2. **RemixableAI** - <http://remixable.ai/>

My own software suite, which is now approaching \$300k in dev costs and basically automates every aspect of running a digital product business (either as an affiliate, Youtuber, list builder or product owner). This now has Chat-GPT fully integrated into the tool (for copywriting) along with 30+ training videos on AI. If you want to sell your own product this is indispensable. For example, Upsell 3 for Ultimate AI lets you create unlimited AI graphics, and the wrap those graphics into software tools (thus creating unlimited software tool). I then used Remixable AI to make me an entire sales letter + video which you

can preview here <https://remixable.net/ecover/> - this is made with Remixable, better than 90% of the pro sales letters you see on Warrior.. And yet *I'm not even bothering to sell it* (just including it as a bonus within Remixable). I really can't stress enough how much of a level up Remixable AI is for everything I do)

3. MidJourney - <https://www.midjourney.com/>

The top AI graphics tool. Word is they are entering "alpha" on a website hosted version of the tool - no more Discord in May? Hope so! 90% of the images on my site are done with MidJourney. It is simply the best tool for graphics out there. Only problem with MJ is the cost (\$10/\$30/\$60 per month although \$10 will suffice for most people). Honorable mention - <https://www.bluewillow.ai/> which isn't quite as good as MidJourney but works very similar, uses the same prompting system and has one big benefit - it's free!

4. Leonardo AI- <https://leonardo.ai/>

The best, most consistent graphics tool for using the "Stable Diffusion" model. Again has the added benefit of being free! This one is technically "waiting list" although in practice, it only takes 24-48 hours so go ahead and request your invite now. Leonardo has a great free plan, so if you're on a budget and just want a quick way to make AI graphics with no fuss, then this + my VinciVisions app could be your simple win.

5. PlaygroundAI- <https://playgroundai.com/>

Powerful tool running Stable Diffusion. Has inpainting/edit feature, but IMHO not quite as good as Leonardo. This does give you more flexibility though, so if you're a big artist or just want to pull back the hood and go "full nerd" then this could be the Diffusion model for you.

6. Kaiber <https://www.kaiber.ai/> + Runway ML- <https://runwayml.com/>

Both video creation tools. Runway's "GEN-1" feature and Kaiber both let you upload a video (eg from a stock photo website like [Pexels](#)) and then enter a text prompt or image to style your video. Runway now allow you to create up to 15 secs of video at a time (as of 27th April), but I currently prefer Kaiber for "remixing videos in new styles". However, Runway does have MANY different features I've barely had time to play with (like the green screen background removal and interpolation which merges images into a seamless transition) Could have played a bigger part in the uLTIMATE AI sales video.. Alas maybe next time). Runway also rolled out a mobile app, so check that out.

7. Canva AI - <https://www.canva.com/>

Announced a whole suite of AI tools in a big "create" event in March. VERY powerful when combined with MidJourney (create in MJ, edit in Canva AI). Their "AI Image Editor" is exceptionally good and provides the best inpainting.

Simply import an image, click “edit image”, choose the AI editor and then enter a command (eg “put glasses on robot”). AI feature only available with their pro plan (\$10 month) and it only allows 100 edits per day. Trust me, I found out the hard way!

8. **ElevenLabs** - <https://beta.elevenlabs.io/voice-lab>

The best AI voice generation tool right now. Clone voices, create voices from scratch. Extremely powerful - especially when chained with something like Remixable Copywriter VSL script > ChatGPT remix it to new niche > Elevenlabs voice-over > Remixable video > Remixable website, to make pages and videos like [this](#) in around 1-2 hours.

9. **DallE**- <https://labs.openai.com/>

As recently as Summer 2022, this was the most exciting AI on the planet. Now it's barely making my top 10! To be fair to OpenAI, they do have other priorities! Also, whilst not *free* this does charge you per image (no subscription). Also, DallE has inpainting (upload an image and edit), although it's not quite as good as Canva AI's inpainting/editing. Categorically, this AI is transformed with my Image Whisperer 2.0 tool plugin and app, though.

10. **OpenAI Playground**- <https://platform.openai.com/playground>

Run Chat-GPT from a different interface. That's useful if you hit a limit (it's paid, so pretty much always “on”). The playground also lets you enter a “system” message like “pretend you are a pro copywriter” for extra control...

7. Getting The Best From UltimateAI

There are a number of AI tools that I use (well, I use them all!) But the two in particular I recommend are Chat-GPT and MidJourney. Also... Chat-GPT, LeonardoAI (images), PlaygroundAI (images), BlueWillow (images) & ElevenLabs (voice) have **free** plans. If you're on a budget, here are my recommendations...

SOMEWHAT LIMITED BUDGETS...

“I have absolutely no money at all” - get Chat-GPT and use Bing Chat also

“I can only afford \$20 per month” - get Chat-GPT Plus (UK and US only right now) and get BlueWillow instead of MidJourney (same prompts work)

“I can only afford \$30 per month” - get Chat-GPT Plus and MidJourney basic plan

OR... IF YOU'RE SERIOUS ABOUT MONEY MAKING...

“I am serious about AI, and want the best” - if that's you, then get Chat-GPT Plus. Then get Remixable AI (see below). Next, get MidJourney. Next, get Canva Pro (to

access the AI inpainting and editing of images). Finally, consider Runway ML for video. Use all these tools & stay subscribed - big updates happening in April!

8. Final Thoughts

Be sure to check out **Remixable**, my marquee software.

Remixable is the all-in-1 software I used to build ALL pages + videos for Ultimate AI! Everything including the software was built with Remixable, Chat-GPT, MidJourney, ElevenLabs, CanvaAI and Dall-E.. Exactly as described in the Remixable training videos!

Basically, Remixable + AI is how I did ALL of the funnel!

- Check out [Remixable \(now with AI preloaded\) here](#)
- Check out the “[How I made \\$1M webinar here](#)”

OK, keep your eye on your email. Big updates dropping in May 2023 - and beyond!

Thanks, Chris
